TISSUE NAPKINS 40 x 40 CM 1/8-FOLD

Maximum print area: 90 × 190 mm
Final size: 100 × 200 mm

File:	Always submit your design as a PDF using our artwork template. This ensures that the dimensions and print position are correct, helping to prevent production errors.
Print colours:	Submit full-colour artwork in CMYK. Use 100% K (0 / 0 / 0 / 100 CMYK) for black only. Set the opacity of all elements to 100%. No white ink will be printed; any white areas in the artwork will appear as the colour of the napkin.
Resolution:	A resolution of 300 dpi is recommended (minimum 150 dpi), or submit your artwork as a vector file. The higher the resolution, the better the print quality.
Text:	Always convert all text to outlines.
Print marks:	The file must be submitted without print marks.
Text size:	Small text and fine details may fill in during printing.
Readability:	Check the readability by viewing the file at 100% size (do not zoom in).
Safety margin:	Place all elements inside the safety margin. Anything outside will not be printed.
Layers:	Place all design elements on the design layer so that the template layer can be safely removed without losing any parts of the design.

Check before submitting:

- ☐ PDF placed in the artwork template
- ☐ No print marks
- ☐ Text converted to outlines
- ☐ Images at a minimum of 300 dpi
- ☐ All elements inside the safety margin
- ☐ Design placed on the design layer
- ☐ Print colours set correctly

Use this checklist to verify that the files you are submitting are ready for production.
This helps prevent delays in processing your order.

Please note for full-coverage printing:

With digital printing, large, solid areas of color may show slight banding and/or variations in color coverage.
This is inherent to the digital printing process.
